Answers Book 4 Teens 2012-07 question answering qa systems on the try to provide crisp answers to information needs posed in natural language replacing the traditional ranked list of documents qa posing a multitude of research challenges has emerged as one of the most actively investigated topics in information retrieval natural language processing and the artificial intelligence communities today the flip side of such diverse and active interest is that publications are highly fragmented across several venues in the above communities making it very difficult for new entrants to the field to get a good overview of the topic through this book we make an attempt towards mitigating the above problem by providing an overview of the state of the art in question answering we cover the twin paradigms of curated sources used in qa tasks trusted text collections like wikipedia and objective information distilled into large scale knowledge bases we discuss distinct methodologies that have been applied to solve the qa problem in both these paradigms using instantiations of recent systems for illustration we begin with an overview of the problem setup and evaluation cover

notable sub topics like open domain multi hop and conversational qa in depth and conclude with key insights and emerging topics we believe that this resource is a valuable contribution towards a unified view on qa helping graduate students and researchers planning to work on this topic in the near future
