on the responsibility to protect civilians from violence and drawing on traditional just war principles the central premise of this book is that humanitarian military intervention can be justified as a policy option only if decision makers can be reasonably sure that intervention will do more good than harm this book asks have past humanitarian military interventions been successful it defines success as saving lives and sets out a methodology for estimating the number of lives saved by a particular military intervention analysis of 17 military operations in six conflict areas that were the defining cases of the 1990s northern iraq after the gulf war somalia bosnia and herzegovina rwanda kosovo and east timor shows that the majority were successful by this measure in every conflict studied however some military interventions succeeded while others failed raising the question why have some past interventions been more successful than others this book argues that the central factors determining whether a humanitarian intervention succeeds are the objectives of the intervention and the military strategy employed by the intervening states four types of humanitarian military intervention are offered helping to deliver emergency aid protecting aid operations saving the victims of violence and defeating the perpetrators of violence the focus on strategy within these four types allows an exploration of the political and military dimensions of humanitarian intervention and highlights the advantages and disadvantages of each of the four types humanitarian military intervention is controversial scepticism is always in order about the need to use military force because the consequences can be so dire yet it has become equally controversial not to intervene when a government subjects its citizens to massive violation of their basic human rights this book recognizes the limits of humanitarian intervention but does not shy away from suggesting how military force can save lives in extreme circumstances provides information on the truck and specialty vehicles business including automotive industry trends and market research mergers acquisitions globalization
