The world has recently witnessed Russia's controversial annexation of Crimea in 2014 and its involvement in the conflict in Ukraine. These events have left international audiences stunned. Russia now occupies a central place on the Western security agenda and has been recast as an important area of scholarly inquiry. The conflict has raised important questions about Russia's understanding of conflict management and its approach to contemporary European security. This book provides a timely and contextual exploration of Russia's post-Soviet legacy of conflict management in the backdrop of its interaction with Europe's system of security governance by exploring Russia's approach from the early 1990s to the present day. The book offers a comprehensive exploration into the evolution of Russian behavior, investigating whether Russia's approach has developed in accordance with the policies and practices of security governance that have emerged in the European experience of conflict management. Together with extensive documentary analysis and elite interviews, it employs the framework of security governance to examine Moscow's behavior across a set of case studies situated in the European political and security environment. It offers a timely contribution to our understanding of Russia's response to intrastate conflict and Russia's broader engagement with its contemporary security environment. This book examines how Rwandan elites within the government, private sector, and civil society perceive the nation's political and economic relationship with the international community using testimonies and interviews of Rwandan political, military, and economic leaders and bureaucrats. This book examines the intersubjective beliefs that formulate how Rwanda engages with the international community. The book presents and analyzes three primary intersubjective themes: historical and possible future abandonment of Rwanda; implementing an ideology of *agaciro* to promote self-respect, dignity, and self-reliance for state security and economic development; and the belief in the government's obligation to promote human security for those who identify as Rwandan. These perceptions help us understand how post-genocide Rwanda engages with the international community in the pursuit of state security, economic development, and to prevent a future genocide. This book will be of interest to students and scholars of African politics and international relations, as well as the politics of post-genocide states. Russia's surprising return to the world stage since 2000 has aroused the curiosity, if not the fear, of the West. Gradually, the Kremlin went from a policy of deference to foreign powers to acting with independence. The driver of this transformation was President Vladimir Putin, who with skillful caution navigated Russia back into the ranks of global powers in theaters of conflict such as Georgia, Syria, and Ukraine. The Kremlin won significant victories at little cost to consolidate its decisive position. Following a chronological approach from the fall of the Soviet Union to the present, this book draws on new documents to describe how Russia regained its former global prominence. Clear accounts of key decisions and foreign

India's Bridgehead to South East Asia analyses the instrumental role of IEP in bringing a tectonic shift in India's foreign trade by redirecting the focus from the west to the east thus leading to a fundamental change in the nature of India's economic interdependence. Besides discussing foreign trade, it expounds as to how IEP made India play an important role in the emerging Asian security architecture and liberated Indian foreign policy from being centred on South Asia. The essays also enumerate the reasons for IEP's failure in the North Eastern region and chart out actionable programmes for course correction that might be factored into its latest edition, *The Act East Policy*. This book will interest scholars and researchers of international relations, international trade and economics, politics and particularly those concerned with Northeast India. India has the world's fourth largest military and one of the biggest defence budgets. It asserts its political and military profile in South Asia and the Indian Ocean region. The nation has been in the midst of an ambitious plan to modernize its largely Soviet era arms since the late 1990s and has spent billions of dollars on latest high tech military technology. This handbook canvasses over 60 years of Indian defence policy and the major debates that have shaped it. It discusses several key themes such as the origins of the modern armed forces in India, military doctrine and policy, internal and external challenges and nuclearization and its consequences. It includes contributions by well known scholars, experts in the field and policymakers and provides an annotated bibliography for further research presented in an accessible format. This lucidly written handbook will be an indispensable resource for scholars and researchers of security and defence studies, international relations and political science as well as for government think tanks and policymakers.
