Michigan's Unsolved Mysteries (& Their "Solutions") 1994 today all
librarians face daunting challenges posed by trends in technology
publishing and education as the impact of a globalising information
economy forces a rethink of both library strategic directions and
everyday library operations this book brings together the main issues and
dilemmas facing libraries the book clearly shows how to deal with them
and provides a best practice guide to the solutions provides analysis of
recent trends and relevant and viable solutions to problems facing all
librarians written by a highly knowledgeable and well respected
practitioner in the field draws on the author s international and practical
experience in libraries and experience of leading edge developments in
the field

Michigan 2008-04-07 climate change solutions represents an application
of critical theory to examine proposed solutions to climate change

drawing from marx's negative conception of ideology the authors illustrate how ideology continues to conceal the capital climate contradiction or the fundamental incompatibility between growth dependent capitalism and effectively and justly mitigating climate change dominant solutions to climate change that offer minor changes to the current system fail to address this contradiction however alternatives like degrowth involve a shift in priorities and power relations and can offer new systemic arrangements that confront and move beyond the capital climate contradiction while there are clear barriers to a systemic transition that prioritizes social and ecological well being such a transition is possible and desirable

Climate Change Solutions 2020-07-17 we all know that the actual process of empirical research is a messy complicated business that at best only approximates the models we impart to students research confidential pulls back the curtain on this process laying bare the sordid details of the research process but doing so in a way that respects the ideals of social research and that provides useful lessons for young scholars it should be required reading for our research methods courses michael x delli carpini dean annenberg school for communication university of pennsylvania in this impressive volume some of the brightest young lights in social research have taken us backstage to share what they learned from their innovative projects besides providing a wealth of help with methodological concerns the book includes theoretical and career issues to consider when doing research anyone doing research should benefit from reading it caroline hodges persell professor of sociology new york university research confidential complements existing methods literature by providing refreshingly honest accounts of key challenges and decision forks in the research road each chapter enlightens and entertains kirsten foot associate professor of communication university of washington a must read for researchers embarking on new projects rather than the abstract descriptions of most methods textbooks this volume provides rich accounts of the firsthand experiences of actual researchers an invaluable resource of practical advice critically it will make new researchers aware of the actual challenges that they are likely to face in their work christopher winship editor of sociological methods and research and

professor of sociology harvard university this collection of essays aims to fill a notable gap in the existing literature on research methods in the social sciences while the methods literature is extensive rarely do authors discuss the practical issues and challenges they routinely confront in the course of their research projects as a result editor eszter hargittai argues each new cohort is forced to reinvent the wheel making mistakes that previous generations have already confronted and resolved research confidential seeks to address this failing by supplying new researchers with the kind of detailed practical information that can make or break a given project written in an informal accessible and engaging manner by a group of prominent young scholars many of whom are involved in groundbreaking research in online contexts this collection promises to be a valuable tool for graduate students and educators across the social sciences eszter hargittai is associate professor of communication studies at northwestern university and fellow at the berkman center for internet society at harvard university cover art courtesy of dustin gerard
